

*Jerrold Lundgard,
Peace River, Alberta*

I have a rural background and was born and raised in Northwestern Alberta.

I have been involved in the debate over firearms legislation from 1976 to present and am very familiar with the Firearms Act, the Criminal Code penalties attached to the Firearms act, and firearms regulations.

My past activities as a volunteer included working with the Alberta Fish and Game Association on firearms issues, keeping in touch with my Member of Parliament over firearms issues as well as keeping my M.L.A. informed, and working with the Responsible Firearms owners of Alberta to get firearms legislation changed (From 2001 to present).

I have been a volunteer with the Alberta Fish & Game Association on the club level in Peace River since 1980 and as Zone 6 director (affiliated Alberta Fish & Game Clubs in the Peace River region make up Zone 6).

I am aware of many of the problems the firearms legislation and criminal code create for law abiding gun owners and have worked to resolve those problems to the benefit of Canadian Gun owners,

I believe that I can contribute to public education regarding the firearms act and criminal code and believe that I can help make significant changes to both to the benefit of Canadian gun owners.

Sincerely

Jerrold Lundgard
