Daniel Therrien, Commissioner  
Office of the Privacy Commissioner of Canada  
30 Victoria Street  
Gatineau, Quebec  
K1A 1H3

Dear Mr. Therrien:

**RE: RECOMMENDATIONS - FIREARMS INTEREST POLICE (FIP) DATA BANK?**

The RCMP Commissioner of Firearms recently tabled his report for 2013 in Parliament. Table 9 of his report records 115,878 Firearms Interest Police(FIP) reports were "automatically generated and sent to the relevant CFO for review." See link for this document below.

In 1999, the Library of Parliament reported the following problems with the FIP Data Bank:

1. "The reliability of this system depends on the information that is being kept in the files of the different police agencies across the country."
2. "It should be noted that all police agencies have their own procedures for their files and how events get coded. This means that a similar event that occurs in two different locations may be coded differently. In such a case, one of the events might end up being linked to the F.I.P. file while the other is not."
3. "Another consequence of the different procedures used by police agencies across Canada is that, in some cases, individuals who are not a safety concern will be linked to the F.I.P. data base. For example, in some agencies all of the names in a file are linked to the ORI code. **Therefore, a person who is a witness to an offence or even the victim of an offence may have their name in the F.I.P data base** because their name was linked to one of the codes which fell under the selection criteria pursuant to section 5 of the Firearms Act."
4. "If the individual wished to obtain the information contained in the police agency's file, a second privacy request would have to be made to this agency. Depending on the agency, this might require a privacy request under provincial privacy legislation." [Emphasjs added]  
See link to this document below.

In 2001, Privacy Commissioner George Radwanski made the following recommendation regarding the FIP Data Bank: **"Mechanisms should be in place to ensure that individuals have easy access to FIP records and the ability to correct or place a notation to file relating to disputed FIP entries."** [Emphasis added] See link to this document below.

In 2002, Auditor General of Canada Sheila Fraser reported the following concerns regarding the FIP Data Bank:

**11.30 In November 1998 and March 2000**, the Senior Executive Committee of the RCMP was informed that officers responsible for the RCMP's contributions to the Firearms Interest Police database had serious concerns about the accuracy and completeness of the information. We reviewed RCMP files and made other inquiries to confirm the significance of these concerns.

**11.31 An April 2001 RCMP review of data quality stated that:**

- persons are known to be in the database who should not be, and thus could be denied firearms licences or have their eligibility reviewed; and

• some persons who should be in the database are not and these individuals could be issued licences and subsequently use firearms to commit a violent offence.

**The review concluded that a tragic incident could arise as a consequence of the poor data quality and that the RCMP therefore faces serious legal risks.**

**11.32 In 2002, the RCMP further indicated that the quality of the data was still questionable.** [Emphasis added] See link to document below.

In 2003, in response to a request for a status report from MP Garry Breitkreuz's office, Privacy Commissioner George Radwanski stated: "I have reviewed Chapter 11 of the Auditor General's Report, which dealt with the Firearms Interest Police (FIP) database operated by the RCMP for the Firearms Program. **Many of the systemic problems noted by the Auditor General with FIP record inaccuracies were previously outlined in my "Firearms Report" of August 2001. At that time, I had noted problems of individuals being improperly flagged in FIP, while other individuals who should have been flagged were not.** For FIP to be an effective early warning flag for potential violence, it is vital that police officers keep their incident reports accurate and up-to-date regarding the status of persons responsible for incidents covered by section 5 of the *Firearms Act*. Moreover, the *Privacy Act* requires that information collected for an administrative purpose be up to date and as accurate as possible. **To date, the department has not implemented my recommendations, nor has it provided any of the progress reports I have requested.**" [Emphasis added] See link to document below.

I respectfully request an update from your office on any progress that has been made over the last ten years with respect to implementing the recommendations made by your office; thereby, correcting the errors in and improving access to the FIP Data Bank, especially those who have done nothing wrong and have been entered in the database by mistake.

Sincerely,

[Original signed by]
